Element Call_Event / tetraCallId

Namespace	DR-GW-Interface/DR-GW-Call.Events				
Diagram	<p>The diagram shows an element box labeled 'tetraCallId' with a 'Type' box containing 'xs:unsignedLong'. A line connects this to a note box stating: 'Built-in derived type. The unsignedLong datatype is derived from nonNegativeInteger by setting the value of...'</p>				
Type	xs:unsignedLong				
Properties	<table> <tr> <td>content:</td><td>simple</td></tr> <tr> <td>minOccurs:</td><td>0</td></tr> </table>	content:	simple	minOccurs:	0
content:	simple				
minOccurs:	0				
Source	<code><xs:element name="tetraCallId" type="xs:unsignedLong" minOccurs="0"/></code>				

Element Call_Event / action

Namespace	DR-GW-Interface/DR-GW-Call.Events		
Diagram			
Type	typeActionEvent		
Properties	content:	simple	
Facets	enumeration	incoming	This event fired when there is an incoming call. This is the first indication of a new incoming call.
	enumeration	connected	This event is used to inform that call has been connected and call setup is finished.
	enumeration	held	This event is used to inform TCS Client that individual call was put to hold.
	enumeration	resumed	This event is used to inform that individual call has been taken from hold.
	enumeration	disconnected	This event is used to inform that the call was disconnected.
	enumeration	transferred	This event is a response to transfer method call and indicates the result of the request.
Source	<code><xs:element name="action" type="ctC:typeActionEvent"/></code>

Namespace	DR-GW-Interface/DR-GW-Call.Events
Annotations	This event is used to inform that the call is temporarily paused e.g. if radio subscriber has roamed to a new cell and there are no free resources available.
Diagram	
Type	ct:typeEmpty
Properties	content: complex
Source	<pre><xs:element name="wait" type="ct:typeEmpty"> <xs:annotation> <xs:documentation>This event is used to inform that the call is temporarily paused e.g. if radio subscriber has roamed to a new cell and there are no free resources available.</xs:documentation> </xs:annotation> </xs:element></pre>

Element Call_UnitInEmergencyEvent

Namespace	DR-GW-Interface/DR-GW-Call.Events
Annotations	This event is used to inform DF-Client that a subscriber is in emergency state during an emergency group call including the ending of its emergency situation. Also queuing of emergency speech item requests is indicated using this event. Event is fired every time the TETRA system informs the Gateway that subscriber's emergency information is changed. For example,

based on this information TCS Client could use pre-emptive speech item to request the current speaker to stop in order to let the unit in emergency to speak.

Simple Type typeActionPTTRequest

Namespace	DR-GW-Interface/DR-GW-Call.CommonTypes
Annotations	All possible PTT requests.
Diagram	

Type	restriction of xs:normalizedString		
Facets	enumeration	demandtx	This method can be used to request a speech item for a connected call.
	enumeration	ceasetx	This method is used to inform the system that the speech item is not needed any more.
Source	<pre> <xs:simpleType name="typeActionPTTRequest"> <xs:annotation> <xs:documentation>All possible PTT requests.</xs:documentation> </xs:annotation> <xs:restriction base="xs:normalizedString"> <xs:enumeration value="demandtx"> <xs:annotation> <xs:documentation>This method can be used to request a speech item for a connected call.</xs:documentation> </xs:annotation> </xs:enumeration> <xs:enumeration value="ceasetx"> <xs:annotation> <xs:documentation>This method is used to inform the system that the speech item is not needed any more.</xs:documentation> </xs:annotation> </xs:enumeration> </xs:restriction> </xs:simpleType> </pre>		

Simple Type typeActionRequest

Namespace	DR-GW-Interface/DR-GW-Call.CommonTypes		
Annotations	All possible call actions.		
Diagram			
Type	restriction of xs:normalizedString		
Facets	enumeration	setup	This method is used to initiate a new call setup. For a call setup to be successful it is required that the resources have been reserved prior this method call.
	enumeration	connect	This method is used to connect an incoming call.
	enumeration	hold	This method requests to put an individual call to hold.
	enumeration	unhold	This method is a request for resuming an individual call from hold.
	enumeration	disconnect	This method is used to disconnect a call.
	enumeration	transfer	This method is used to transfer an individual call to a new recipient.
	enumeration	releasecall	This method is used to release radio subscriber's individual call.
